STRABAG
TEAMS WORK.

STRABAG in Poland

STRABAG completes the most prestigious projects in the general, engineering and infrastructural segments of the building industry. It has been working in the Polish building market for over 30 years. The company is a leader in implementation of innovations and new technologies. It offers rich equipment resources, a machinery fleet of the latest generation, the potential of its employed specialists and high quality building materials. A large share of its own capital makes the company a stable partner for investors for completion of projects.

As a part of the infrastructure building industry, STRABAG constructs highways and express roads, national roads, ring roads, railway lines and airports. The comprehensive portfolio of STRABAG also covers modernization and maintenance work on the network of national and local roads. Executed on a large scale and using the latest solutions, bridge structures are flagships of both the concern and the towns in which they are erected. Driving on Polish roads and highways, it is difficult not to notice projects completed by STRABAG. The company has a considerable share in the construction of all highways and express roads, as well as in local roads.

In the area of the general building industry, STRABAG constructs commercial and service centres, public utility buildings, warehouse halls, logistical centres, residential quarters and industrial structures. The company also deals with modernization and maintenance of historical objects. Structures erected by the company are characteristic architectural elements of many Polish towns.

Based on over 30 years of experience acquired in Poland and the concern's own technologies, STRABAG has been developing its portfolio, getting involved in the execution of engineering and power engineering projects, construction of storage yards and rubbish tips complying with environmental protection requirements and standards. It covers building, among other things, flue gas denitrification plants in heat and power stations, as well as full construction jobs dedicated to the power engineering building industry. STRABAG offers also the experience and knowledge of the concern applied to the development of wind power plant projects and other innovative solutions for the renewable energy sector. In addition, it launches in the Polish market technologies for processing municipal waste and producing from it so-called green energy which are unique on the European scale.

STRABAG bases its activities on its own strong and stable equity, its excellent team of specialists and managers continuously improving their qualifications, the latest machinery fleet and many years of experience acquired during execution of projects in Europe and in the world. Our advantages include work on new applications of technologies and their implementation in the Polish building market. We are based on the know-how of the companies of STRABAG Group and our own research performed by specialists employed by us.

The basis for the STRABAG organisational culture is dialogue and mutual respect. Thanks to these accepted values, together we choose directions for development and together we are reaching our goals.

We follow the TEAMS WORK strategy. The components of this strategy are: partnership, involvement, innovativeness, modesty and trust. The bases of these principles are: persistence, solidarity, reliability and respect. Due to these values we can look at our achievements with satisfaction and plan our future in a systematic way

Waldemar Wójcik and Wojciech Trojanowski, Managing Board of STRABAG Sp. z o.o.

Laboratories belonging to STRABAG make sure to maintain the highest quality standards by conducting research and implementing new technologies. The company has a developed network of asphalt mixture factories and its own factories for structural concrete. These are supplied with their own sources of aggregates and the company invests significant means in their further development.

STRABAG has ISO AQAP certificates, as well as the industrial safety certificate which allows it to participate in tenders connected with military infrastructure and tenders in which information protection is required.

STRABAG TEAMS WORK.

STRABAG wants to be perceived as a European technological concern in the building industry ensuring: personnel, building materials and equipment at the right time in the right place thanks to which it completes even the most complicated projects – always on time, maintaining the highest quality and at the best price.
